PACKAGING MACHINES

Horizontals (HFFS)
Series H200 ("s" versions)

ADK has developed this equipment thinking in those smaller producers who start their project with the goal of becoming major quality producers.

Even though this equipment is oriented to mono product processes or little variation, its design and manufacturing is based on the quality of the making, reliability, ease of use, hygiene and ergonomics, assuring a final product which answers a wide variety of applications.

The result is an ideal packaging machine to satisfy the most demanding needs of small and medium-sized companies.

SOME APPLICATIONS

- » Minimum maintenance
- » Very good portability
- » Great productivity

Models	Container max. Dimensions (Widht x High x Long)	Coil max. width	Max. production speed	Mechanization	Packing material	Machine dimensions (Widht x High x Long)
H202 ^s	160 x 60 x 360 mm	350 mm	70 ppm	2 mot.	BOPP	760 x 910 x 1800 mm

Standard pillow bag
Material: BOPP (biaxially oriented polypropylene) and its variations.

Pillow bag with pleats
Material: BOPP (biaxially oriented polypropylene) and its variations.

These values may change according to the characteristics of the product, package type, packaging materials, among others.
* Max. dimensions for each section of the package. Not compatible. (Operations outside the specified ranges, under analysis and technical approval).

TECHNICAL SUPPORT

ADK knows about the importance of the decision to invest in the acquisition of packaging equipment.

That is why we lay special emphasis on developing a close collaboration with our clients as the mainstay of satisfaction, constantly working with a spirit of service and immediate attention.

We base ourselves on our extensive experience to provide comprehensive counseling from the initial approach of our clients about their projects, to design and manufacture the equipment that adjusts to the real needs of each business, providing assistance and service while the equipment is being produced.

All the information provided herein is not a legally-binding, subject to change without notice

Remote support, allowing to diagnose problems via internet with direct connections.

TECHNICAL ASSISTANCE

To do so, we have designed a system characterized by its rapidity and quality of attention. The fundamental points on which we have worked are:

- » Availability of specialized technicians in each area (electronics or mechanics).
- » Service of preventive consultancy to avoid future problems or shortage of supplies of spare parts.
- » Direct telephone support with technicians of our plant.

INSTALLATION AND START-UP

It is done by ADK own technicians, who have received specialized training for such a task.

- » Training of operators and maintenance personnel subsequent to the setting up of the equipment.
- » Possibility of obtaining a certification of good performance of the equipment in ADK plant.
