Horizontals (HFFS)
Series H400 | H500 ("i" versions)

This section of equipment H400-H500 defines a group of medium-sized equipment providing coverage for medium-sized and small products. On this range, there are versions of low, medium and high production.

Type "i", with lower coil support. Applicable for complex products and their formats, very flexible or irregular behavior during the packaging process.

SOME APPLICATIONS

- » Easy use for the operator
- » Minimum maintenance
- » Great productivity

Models	Container max. Dimensions (Widht x High x Long)	Coil max. width	Max. production speed	Mechanization	Packing material	Machine dimensions (Widht x High x Long)
H402 <sup>i</sup>	160/210 x 70/100 x 350 mm	500 mm	120 ppm	2 mot. + 1 serv.	BOPP	1100 x 1360 x 4100 mm
H403 <sup>i</sup>	160/210 x 70/100 x 350 mm	500 mm	120 ppm	3 serv.	BOPP	1100 x 1360 x 4100 mm
H502 <sup>i</sup>	160/210 x 70/100 x 350 mm	500 mm	120 ppm	2 mot. + 1 serv.	PE	1100 x 1360 x 4100 mm
H503 <sup>i</sup>	160/210 x 70/100 x 350 mm	500 mm	120 ppm	3 serv.	PE	1100 x 1360 x 4100 mm

These values may change according to the characteristics of the product, package type, packaging materials, among others.  
 \* Max. dimensions for each section of the package. Not compatible. (Operations outside the specified ranges, under analysis and technical approval).

Standard pillow bag  
 Material: BOPP (biaxially oriented polypropylene) and its variations.

Standard pillow bag  
 Material: PE (polyethylene) and its variations.

Pillow bag with pleats  
 Material: BOPP (biaxially oriented polypropylene) and its variations.

Pillow bag with pleats  
 Material: PE (polyethylene) and its variations.

## TECHNICAL SUPPORT

ADK knows about the importance of the decision to invest in the acquisition of packaging equipment.

That is why we lay special emphasis on developing a close collaboration with our clients as the mainstay of satisfaction, constantly working with a spirit of service and immediate attention.

We base ourselves on our extensive experience to provide comprehensive counseling from the initial approach of our clients about their projects, to design and manufacture the equipment that adjusts to the real needs of each business, providing assistance and service while the equipment is being produced.

All the information provided herein is not a legally-binding, subject to change without notice

Remote support, allowing to diagnose problems via internet with direct connections.

## TECHNICAL ASSISTANCE

To do so, we have designed a system characterized by its rapidity and quality of attention. The fundamental points on which we have worked are:

- » Availability of specialized technicians in each area (electronics or mechanics).
- » Service of preventive consultancy to avoid future problems or shortage of supplies of spare parts.
- » Direct telephone support with technicians of our plant.

## INSTALLATION AND START-UP

It is done by ADK own technicians, who have received specialized training for such a task.

- » Training of operators and maintenance personnel subsequent to the setting up of the equipment.
- » Possibility of obtaining a certification of good performance of the equipment in ADK plant.
