Horizontals (HFFS)

Series H600 | H700 ("i" versions)

The H600 / H700 series constitute the group of larger size, in direct relation with the size of the feasible packaging products.

Ttype "i": possesses a lower coil support system. This concept allows the packaging of complex products due to their formats, lack of rigidity, or behavior in the packaging process.

SOME APPLICATIONS

- » *Robustness*
- » *Minimum maintenance*
- » *High-tech*
- » *Great productivity*

Models	Container max. Dimensions (Width x High x Long)	Coil max. width	Max. production speed	Mechanization	Packing material	Machine dimensions (Width x High x Long)
H602ⁱ	320/380 x 70/150 x 500 mm	700 / 860 mm	60 / 120 ppm	2 mot. + 1 serv.	BOPP	1350 x 1420 x 6000 mm
H603ⁱ	320/380 x 70/150 x 500 mm	700 / 860 mm	60 / 120 ppm	3 serv.	BOPP	1350 x 1420 x 6000 mm
H702ⁱ	320/380 x 70/150 x 500 mm	700 / 860 mm	60 / 120 ppm	2 mot. + 1 serv.	PE	1350 x 1420 x 6000 mm
H703ⁱ	320/380 x 70/150 x 500 mm	700 / 860 mm	60 / 120 ppm	3 serv.	PE	1350 x 1420 x 6000 mm

These values may change according to the characteristics of the product, package type, packaging materials, among others.
* Max. dimensions for each section of the package. Not compatible. (Operations outside the specified ranges, under analysis and technical approval).

Standard pillow bag
Material: BOPP (biaxially oriented polypropylene) and its variations.

Standard pillow bag
Material: PE (polyethylene) and its variations.

Pillow bag with pleats
Material: BOPP (biaxially oriented polypropylene) and its variations.

Pillow bag with pleats
Material: PE (polyethylene) and its variations.

TECHNICAL SUPPORT

ADK knows about the importance of the decision to invest in the acquisition of packaging equipment.

That is why we lay special emphasis on developing a close collaboration with our clients as the mainstay of satisfaction, constantly working with a spirit of service and immediate attention.

We base ourselves on our extensive experience to provide comprehensive counseling from the initial approach of our clients about their projects, to design and manufacture the equipment that adjusts to the real needs of each business, providing assistance and service while the equipment is being produced.

Remote support, allowing to diagnose problems via internet with direct connections.

All the information provided herein is not a legally-binding, subject to change without notice

TECHNICAL ASSISTANCE

To do so, we have designed a system characterized by its rapidity and quality of attention.

The fundamental points on which we have worked are:

- » Availability of specialized technicians in each area (electronics or mechanics).
- » Service of preventive consultancy to avoid future problems or shortage of supplies of spare parts.
- » Direct telephone support with technicians of our plant.

INSTALLATION AND START-UP

It is done by ADK own technicians, who have received specialized training for such a task.

- » Training of operators and maintenance personnel subsequent to the setting up of the equipment.
- » Possibility of obtaining a certification of good performance of the equipment in ADK plant.
