PACKAGING MACHINES

Verticals (VFFS)
Series V700BL | V1000BL (Linear Weigher)

In the range of equipment for the vertical packaging, for products that do not respond to a particular format, ADK offers a series of models V700 and V1000, each of them, according to the size ranges of the packs to make.

This line of vertical equipment (V700 and V1000), in this case, is equipped with dosing LINEAR WEIGHER systems which are best suited for dispensing bulk goods of different formats such as, different kinds of biscuits, short dry noodles, snacks, pet food, etc.

SOME APPLICATIONS

- » High performance
- » Latest technology
- » Practicality and simplicity
- » Low maintenance cost

Models	Container max. Dimensions (Widht x High x Long)	Coil max. width	Max. production speed	Mechanization	Packing material	Machine dimensions (Widht x High x Long)
V700BL	230 x 300 mm	680 mm	45 ppm	1 mot.	BOPP / PE	1400 x 1650 x 1900 mm
V1000BL	380 x 500 mm	980 mm	45 ppm	1 mot.	BOPP / PE	1500 x 1650 x 1900 mm

These values may change according to the characteristics of the product, package type, packaging materials, among others.

Standard pillow bag
Material: BOPP (biaxially oriented polypropylene) and its variations. PE (polyethylene) and its variations.

Pillow bag with flat bottom
Material: BOPP (biaxially oriented polypropylene) and its variations. PE (polyethylene) and its variations.

TECHNICAL SUPPORT

ADK knows about the importance of the decision to invest in the acquisition of packaging equipment.

That is why we lay special emphasis on developing a close collaboration with our clients as the mainstay of satisfaction, constantly working with a spirit of service and immediate attention.

We base ourselves on our extensive experience to provide comprehensive counseling from the initial approach of our clients about their projects, to design and manufacture the equipment that adjusts to the real needs of each business, providing assistance and service while the equipment is being produced.

All the information provided herein is not a legally-binding, subject to change without notice

Remote support, allowing to diagnose problems via internet with direct connections.

TECHNICAL ASSISTANCE

To do so, we have designed a system characterized by its rapidity and quality of attention. The fundamental points on which we have worked are:

- » Availability of specialized technicians in each area (electronics or mechanics).
- » Service of preventive consultancy to avoid future problems or shortage of supplies of spare parts.
- » Direct telephone support with technicians of our plant.

INSTALLATION AND START-UP

It is done by ADK own technicians, who have received specialized training for such a task.

- » Training of operators and maintenance personnel subsequent to the setting up of the equipment.
- » Possibility of obtaining a certification of good performance of the equipment in ADK plant.
